S	CORING GUIDELINES					
	<ul> <li>Make sure the parent has answered all questions and has checked the concer Step 2. If not all questions have been answered, you should first try to contact score (see pages 39 and 41 of <i>The ASQ:SE User's Guide</i>).</li> <li>Review any parent comments. If there are no comments, go to Step 3. If a parent on pages 39, 41, and 42 of <i>The ASQ:SE User's Guide</i> to determine if the respousing the following point system:</li> </ul>	the parent to obtain answers or, if necessary, calculate an average has written in a response, see the section tilled "Parent Comments"				
	Z (for zero) next to the checked box	= 0 points				
	V (for Roman numeral V) next to the checked box	= 5 points				
	X (for Roman numeral X) next to the checked box	= 10 points				
	Checked concern	≖ 5 points				

### SCORE INTERPRETATION

#### 1. Review questionnaires

Add together:

Review the parent's answers to questions. Give special consideration to any individual questions that score 10 or 15 points and any written or verbal comments that the parent shares. Offer guidance, support, and information to families, and refer if necessary, as indicated by score and referral considerations.

Child's total score =

#### 2. Transfer child's total score

In the table below, enter the child's total score (transfer total score from above).

Total points on page 3 Total points on page 4 Total points on page 5 Total points on page 6

Questionnaire interval	Cutoff score	Child's ASQ:SE score
18 months	50	

#### 3. Referral criteria

Compare the child's total score with the cutoff in the table above. If the child's score falls above the cutoff and the factors in Step 4 have been considered, refer the child for a mental health evaluation.

#### 4. Referrel considerations

It is always important to look at assessment information in the context of other factors influencing a child's life. Consider the following variables prior to making referrals for a mental health evaluation. Refer to pages 44–46 in *The ASQ:SE User's Guide* for additional guidance related to these factors and for suggestions for follow-up.

- Setting/time factors
  - (e.g., Is the child's behavior the same at home as at school?, Have there been any stressful events in the child's life recently?)
- Development factors
  - (e.g., is the child's behavior related to a developmental stage or a developmental delay?)
- Health factors
  - (e.g., Is the child's behavior related to health or biological factors?)
- · Family/cultural factors

(e.g., is the child's behavior acceptable given cultural or family context?)
